Dear Subscriber,

**Subject: Registration for Traceability Module**

We are pleased to confirm your registration for the **'Traceability Module'** in DataKart.

You can now generate serialised barcoded labels for your primary and secondary packs using GS1 standards by logging into your [DataKart account](#) using your existing username and password. This would enable track & trace of your packs across the supply chain from point of manufacture/packaging till point of consumption.

These barcoded labels need to be affixed/stickered on your products and scanned using the **'Trace'** mobile application. For downloading the Trace mobile app, scan the barcode appearing under 'Scan To Download Trace APP' in the Traceability Module in DataKart.

To access your Traceability Module, please ensure that your GS1 Company prefix number **89041184** remains valid at all times.

Kindly note that your registration for the Traceability Module is valid upto **30/09/2021**. For continued use beyond this date, you would need to renew your subscription for the **'Traceability Module'** on or before the validity date.

Kind regards,

A handwritten signature in blue ink that reads 'Vinay Gupta'.

(Vinay Gupta)

Chief General Manager(F&A)
